

1. Information about the indicator	
Goal	Taking urgent measures to combat climate change and its consequences
Task	Improve education, information dissemination, and the capacity of people and institutions to mitigate, adapt to, and prevent climate change.
The indicator	The proportion of students involved in organized social activities, including through student self-government and the debate movement in order to increase the level of citizenship and patriotism
2. Information about the organization	
Organization	Ministry of Education of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The ratio of the number of students in TVET organizations, universities involved in socially useful activities, to the total number of students in TVET organizations, universities.
Basic concepts:	The indicator provides important information about the level of a country's commitment to achieving this goal, as well as the quality of programs, and can predict the likelihood of students achieving the desired results.
Justification and interpretation	The indicator focuses on the extent to which countries are integrating global citizenship education (GCED) and education for Sustainable Development (SDGs), including education on climate change, human rights, and gender equality, into their education systems, particularly in the areas of policy, curriculum, and student assessment. The indicator provides important information about the level of national commitment to achieve this goal (for example, whether political will/willingness and available resources have been translated into a specific policy, curriculum, or assessment) and the quality of programs provided, and can predict how likely desired outcomes are to be achieved. This indicator can be complemented by other thematic indicators on GCED or ESD offered by UNESCO, which seek to assess results more accurately in cognitive, socio-emotional and behavioral areas. The indicator can be used to assess contributions to formal as well as non-formal education systems.
4. Data sources and collection methods	
Data sources	Source of information: Form No. WU-3 "Information on district, city and regional children's and youth associations of educational organizations of the Republic, events, projects, and student self-government bodies", Order No. 570 of the Minister of Education and Science of the Republic of Kazakhstan dated December 27, 2012 "On approval of administrative data forms within the framework of educational monitoring", National educational database. Location: Internet resource of the Ministry of Education of the Republic of Kazakhstan, section "Activities – Basic documents – Concept of industry development – All documents of this category" (https://www.gov.kz/memleket/entities/edu/documents/details/456995?lang=ru).
Data collection methods	Administrative data of the National Educational Database
Unit of measurement	Percent

Periodicity	Annually
5. Calculation method and other methodological considerations	
Calculation method:	$H = (G+A) \div F \times 100\%$, where: H – the proportion of students involved in organized social activities, including through student self-government and the debate movement; G – the number of students in grades 6-11 involved in the debate movement during the reporting period; A – the number of students in grades 6-11 involved in student self-management during the reporting period; F – the total number of students in grades 6-11 of full-time public secondary schools under the jurisdiction of the Ministry of Economic Development during the reporting period.
Comments and restrictions:	-
6. Data availability and disaggregation	
Data availability and gaps:	The data is available on the website of the Ministry of Education of the Republic of Kazakhstan.
The level of disaggregation:	The data is disaggregated at the country level and at the regional level.
7. Comparability with international data/standards	Alternative national
8. References and documentation	-
