

1. Information about the indicator	
Goal	Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development
Task	Enhance international support for implementing effective and targeted capacity-building in developing countries to support national plans to implement all the Sustainable Development Goals, including through North-South, South-South and triangular cooperation
The indicator	Dollar value of financial and technical assistance (including through North-South, South-South and triangular cooperation) committed to developing countries
2. Information about the organization	
Organization	Ministry of Foreign Affairs of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	Gross payments of total ODA and other official flows of Kazakhstan for capacity-building and national planning purposes.
Basic concepts:	ODA: CEB defines ODA as “flows to countries and territories included in the list of recipients of ODA to CEB and multilateral institutions, which (i) are provided by official institutions, including State and local authorities, or their executive bodies; (ii) Each transaction is carried out with the promotion of the economic development and welfare of developing countries as its primary objective; and is concessional in nature and transfers a grant element of at least 25 per cent (calculated at a discount rate of 10 per cent). Other official flows (POPS): Other official flows (with the exception of officially supported export credits) are identified as official sector operations that do not meet the conditions for ODA, either because they are not primarily aimed at development or because they are not sufficiently preferential.
Justification and interpretation	The total volume of ODA and ODA flows to developing countries quantifies government efforts (excluding export credits) that donors provide to developing countries.
4. Data sources and collection methods	
Data sources	The DAC/OECD has been collecting data on official

	and private resource flows since 1960 at the aggregated level and 1973 at the activity level through the creditor reporting system (SRS data has been considered complete since 1995 for obligations at the activity level and 2002 for disbursements).
Data collection methods	The data is provided by donors in accordance with the same OECD standards and methodologies.
Unit of measurement	millions of US dollars
Periodicity	The data is provided in an annual calendar year based on statistical reports to national administrations (aid agencies, Ministries of Foreign Affairs or Finance, etc.)
5. Calculation method and other methodological considerations	
Calculation method:	The amount of ODA and POP is received from all donors in developing countries for capacity-building and national planning.
Comments and restrictions:	The data in the creditors' reporting system has been available since 1973. However, data coverage has been considered complete since 1995 with respect to activity-level commitments and 2002 with respect to disbursements.
6. Data availability and disaggregation	
Data availability and gaps:	For all developing countries eligible for ODA.
The level of disaggregation:	This indicator can be disaggregated by type of flows (ODA or POP), donors, recipient countries, types of financing, types of assistance, sectors, etc.
7. Comparability with international data/standards
