

1. Information about the indicator	
Goal	Taking urgent measures to combat climate change and its consequences
Task	To increase resilience and the ability to adapt to dangerous climatic events and natural disasters in all countries
The indicator	Number of countries that have adopted and are implementing national disaster risk reduction strategies in accordance with the Sendai Framework for Disaster Risk Reduction 2015-2030
2. Information about the organization	
Organization	Ministry of Emergency Situations of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The indicator is defined as the availability of state planning system documents aimed at disaster risk reduction, combating climate change and its consequences.
Basic concepts:	Sustainable development and disaster risk reduction; climate change and disaster risk reduction; assistance, rehabilitation and development
Justification and interpretation	An increase in the number of national Governments that adopt and implement national and local disaster risk reduction strategies, which, according to the Sendai Framework, will aim to ensure the resilience of all societies to the effects of natural hazards and related technological and environmental disasters, in order to reduce human, economic and social losses.
4. Data sources and collection methods	
Data sources	The source is the documents of the state planning system, which include measures aimed at reducing disaster risk, combating climate change and its consequences.
Data collection methods	Coordination of Regional Development Plans and Programs
Unit of measurement	Absent
Periodicity	Annually
5. Calculation method and other methodological considerations	
Calculation method:	Absent
Comments and restrictions:	In order to improve disaster preparedness, regional development plans and programmes should be periodically updated, taking into account climate change scenarios and their impact on disaster risk factors and facilitating, where appropriate, the participation of all sectors and relevant stakeholders
6. Data availability and disaggregation	
Data availability and gaps:	Kazakhstan provides free and open access to information on disaster risks, emergency situations, as well as rules of public behavior in the event of a threat and occurrence of disasters and accidents. Information for the public is posted on the Open Government Internet portal with systematic updates, as well as on the Internet resource of the Ministry of Emergency Situations of the Republic of Kazakhstan. The Dарmen mobile application is actively being promoted among the population of the country, which performs the functions of

	alerting in case of threat and occurrence of an emergency, as well as teaching the procedure for dealing with natural disasters.
The level of disaggregation:	Development plans and programs are disaggregated by region
7. Comparability with international data/standards	Disaster risk reduction strategies have been adopted and are being implemented at the national and local levels in accordance with the Sendai Framework for Disaster Risk Reduction 2015-2030
