

1. Information about the indicator	
Goal	Conservation and rational use of oceans, seas and marine resources for sustainable development
Task	By 2030, enhance the economic benefits received by small island developing States and least developed countries from the environmentally sound management of marine resources, including through the environmentally sound management of fisheries, aquaculture and tourism
The indicator	The share of «Fishing and aquaculture» In GDP
2. Information about the organization	
Organization	Bureau of National Statistics Of the Agency For Strategic Planning And Reforms Of The Republic Of Kazakhstan
3. Definitions and concepts	
Definition	The share of the GVA of Fishing and aquaculture in the total volume of GVA is the ratio between the extracted value of these industries in the total extracted value of the country's economy.
Basic concepts:	GVA of Fisheries and aquaculture
Justification and interpretation	Gross value added (GVA) is the final result of production activities and represents the value added by processing in a given production process. It is calculated at the industry level as the difference between the output of goods and services and intermediate consumption, and includes the cost of fixed capital consumed in the production process.
4. Data sources and collection methods	
Data sources	National accounts statistics
Data collection methods	Statistical research
Unit of measurement	Percent
Periodicity	Annual
5. Calculation method and other methodological considerations	
Calculation method:	$\text{The share of GVA of Fisheries and aquaculture} = \frac{\text{GVA of Fisheries and aquaculture}}{\text{GVA of the total extracted value of the country's economy}}$
Comments and restrictions:	-
6. Data availability and disaggregation	
Data availability and gaps:	The data is available on the website of the Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan.
The level of disaggregation:	No disaggregation is required for this indicator.
7. Comparability with international data/standards	Calculations of GDP indicators comply with international standards. The 2008 SNA prepared by the International Monetary Fund, the Organization for Economic Cooperation and Development, the Statistical Office of the European Communities, the United Nations and the World Bank was used as a methodological basis.
