

1. Information about the indicator	
Goal	End poverty in all its forms everywhere
Task	By 2030, eradicate extreme poverty for all people everywhere, currently measured as people living on less than \$1.25 a day
The indicator	Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)
2. Information about the organization	
Organization	Bureau of National Statistics of the Strategic Planning and Reform Agencies of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The proportion of the population living below the international poverty line is defined as the percentage of the population living on less than USD 2.15 per day at international prices in 2017.
Basic concepts:	Purchasing power parity (PPP), international poverty, income used consumption (DIP). The incomes of the population used for consumption include their own consumption expenditures (excluding investments in production activities and accumulation) and the value (in monetary terms) of the in-kind consumed form of production and transfers.
Justification and interpretation	Poverty monitoring is important for the global development agenda, as well as for the national development agenda of many countries. The World Bank's Development Research Group maintains a database that is updated annually as new survey data becomes available (and therefore may contain more recent data or changes) and conducts an annual reassessment of progress in poverty reduction.
4. Data sources and collection methods	
Data sources	Data Household budget surveys
collection methods	Survey of correspondents Using the forms D 003, D 004, D 008
Unit of measurement	percent
Periodicity	once a year
5. Calculation method and other methodological considerations	
Calculation method:	The ratio of the population living below the international poverty line (by less than 2.15 USD per day in international prices in 2017) to the total population as a percentage.
Comments and restrictions:	Breakdown by Gender is representative of only one republic.
6. Data availability and disaggregation	
Data availability and gaps:	The data is available on the website of the Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan.

The level of disaggregation:	The data is disaggregated by gender, place, and region.
7. Comparability with international data/standards	The income equivalence scale is not used to ensure comparability of the indicator.
