

1. Information about the indicator	
Goal	Ensuring the openness, safety, vitality and environmental sustainability of cities and towns
Task	By 2030, ensure that everyone can be used by safe, inexpensive, accessible and environmentally sustainable transport systems, based on improved road safety, in terms of increasing the use of public transport, paying special attention to the needs of those who are in a connected position, women, children, the disabled and firefighters.
The indicator	The debt of the local roads, which are in good and satisfactory condition
2. Information about the organization	
Organization	Local executive bodies, Ministry of Transport of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	In accordance with the Law of the Republic of Kazakhstan "On Highways" dated July 17, 2001 No. 245. The roads of the Republic of Kazakhstan are divided into public roads, as well as into streets of settlements. Public roads are divided into highways of international, national, regional and district significance. The Ministry of Transport of the Republic of Kazakhstan implements state policy in the field of highways and road activities, which determines the development and approval of rules for the implementation and financing of construction, reconstruction, repair, maintenance, diagnostics, certification and instrumental inspection of roads of international and national importance. According to the Budget Code of the Republic of Kazakhstan, the Ministry of Finance allocates targeted transfers for the construction, reconstruction and repair of roads for roads of regional and district significance. The Ministry allocates targeted amounts for the construction of new roads in cities of national importance (Astana, Almaty and Shymkent) along the streets of populated areas.
Basic concepts:	Bringing the number of highways of regional and district significance in good and satisfactory condition to 95% by the end of 2025.
Justification and interpretation	The indicator is presented as part of the implementation of the Nurly Zhol state infrastructure development program until 2025.
4. Data sources and collection methods	
Data sources	According to the results of the year, akimats of the region provide information to the Ministry of Transport of the Republic of Kazakhstan on the debt of highways of regional and district significance in good and satisfactory composition.
Data collection methods	The indicator is calculated based on the length of roads of regional and district significance, so in 2020 the length of roads of regional and district significance is 70.9 thousand rubles. km of which 71% are in good and satisfactory condition.
Unit of measure ment	Percent
Periodicity	Annual

5. Calculation method and other methodological considerations	
Calculation method:	The indicator is calculated for the correspondence of roads of regional and district significance, so in 2020 the length of roads of regional and district significance is 70.9 thousand rubles. km of which 71% are in good and satisfactory condition.
Comments and restrictions:	
6. Data availability and disaggregation	
Data availability and gaps:	According to the Law of the Republic of Kazakhstan dated July 17, 2001 No. 245 «on highways», highways are divided into public highways, commercial highways, as well as streets of settlements. In turn, the streets of populated areas are the communal property of the akimats of cities and ministries of labor, they are funded and not maintained..
The level of disaggregation:	Regional
