

1. Information about the indicator	
Goal	Building resilient infrastructure, promoting inclusive and sustainable industrialization and innovation
Task	Expand access to financial conditions, including low-cost loans, for small-scale industrial and other enterprises, especially in developing countries, and strengthen greater integration into value chains and markets
The indicator	The share of small businesses with a loan or credit line
2. Information about the organization	
Organization	Bureau of the Agency of National Statistics for Strategic Planning and Reforms of the Republic of Kazakhstan, National Bank of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The category of the entity's enterprise is determined in accordance with the Business Code of the Republic of Kazakhstan. Small business entities are individual enterprises without the formation of a legal entity and legal entities engaged in entrepreneurial activities with an average number of employees not exceeding the length of service and average annual incomes not exceeding three hundred thousand times the monthly calculation index established by the law on the republican budget and effective on January 1 of the relevant fiscal year. Medium-sized businesses are individual enterprises and legal entities engaged in entrepreneurial activities that are not related to small and large businesses.
Basic concepts:	The index shows the number of "small enterprises" with a credit line and/or loan issued by a second-tier bank at the beginning of the year as a percentage of the total number of such enterprises.
Justification and interpretation	This indicator reflects the main message of target 9.3, which helps to bring "small enterprises" to financial conditions.
4. Data sources and collection methods	
Data sources	Reporting on loans and contingent liabilities submitted by the second-tier bank through the AIS "Unified Data Collection System" in the NB RK.
Data collection methods	The information is compiled by subjects of credit history with the codes of a private business entity 01 "A small business entity, including a microenterprise – a legal entity", 02 "A small business entity, including a microenterprise - an individual enterprise" and 03 "a small business entity, including a microenterprise – a peasant or farmer household", which has balances on the first class of "assets" of the TPS and/or a credit facility agreement. Identification of the subject of the credit history is carried out by the number of the subject's document (IIN, BIN and/or RNN – for residents of the Republic of Kazakhstan, AIN – for non-residents of the Republic of Kazakhstan).
Unit of measurement	Percent

Periodicity	Annual
5. Calculation method and other methodological considerations	
Calculation method:	The data is calculated as the ratio of small businesses with a loan and/or credit facility to the population of the Republic of Kazakhstan by gender and individual age groups at the beginning of the year.
Comments and restrictions:	
6. Data availability and disaggregation	
Data availability and gaps:	These achievements since 2013
The level of disaggregation:	Republic of Kazakhstan
7. Comparability with international data/standards	-
