

1. Information about the indicator					
Goal		Building resilient infrastructure, promoting inclusive and sustainable industrialization and innovation			
Task		To support development, research and innovation in the field of domestic technologies in developing countries, including by creating a political climate conducive, in particular, to industrial diversification and increased value added in the raw materials industries			
The indicator		The share of GVA of medium-tech and high-tech industries in the total volume of GVA			
2. Information about the organization					
Organization		Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan			
3. Definitions and concepts					
Definition		The share of GVA of medium-tech and high-tech industries in the total volume of GVA is the ratio between the added value of these industries in the total added value of the country's economy			
Basic concepts:		GVA of the manufacturing industry, GVA of medium-technology and high-tech industries			
Justification and interpretation		Gross value added (GVA) is the final result of production activities and represents the value added by processing in a given production process. It is calculated at the industry level as the difference between the output of goods and services and intermediate consumption, and includes the cost of fixed capital consumed in the production process.			
		Medium-technology and high-tech industries are defined using the OECD classification as follows: International Standard Industrial Classification of All Types of Economic Activity (hereinafter referred to as ISIC) Rev. 3 and Rev. 4:			
		ISIC Rev. 4	Description	ISIC Rev. 3	Description
		20	Production of chemicals and chemicals	24	Production of chemicals and chemicals
		21	Production of basic pharmaceutical products and pharmaceutical preparations	242	Production of other chemical products
		26	Manufacture of computer, electronic and optical products	321	Manufacture of electronic valves and pipes, and other electronic components
		27	Manufacture of electrical equipment	31	Production of electric machines and apparatuses
		28	Production of machinery and equipment included in other groupings	29	Production of machinery and equipment included in other groupings
		29	Manufacture of cars,	34	Manufacture of cars,

		trailers and semi-trailers		trailers and semi-trailers
	30 *	Manufacture of other transport equipment	35 **	Manufacture of other transport equipment
	* Excluding 301 (Construction of ships and boats) ** Excluding 351 (Construction and repair of ships and boats)			
	The share of GVA of medium-tech and high-tech industries in the total volume of GVA = GVA of medium-tech and high-tech industries/ GVA of the entire economy *100			
4. Data sources and collection methods				
Data sources	National accounts statistics			
Data collection methods	Statistical surveys			
Unit of measurement	Percent			
Periodicity	Annually			
5. Calculation method and other methodological considerations				
Calculation method:	The share of GVA of medium-tech and high-tech industries in the total volume of GVA = GVA of medium-tech and high-tech industries/GVA of the manufacturing industry.			
Comments and restrictions:	-			
6. Data availability and disaggregation				
Data availability and gaps:	The data is available on the website of the Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan.			
The level of disaggregation:	Republic of Kazakhstan			
7. Comparability with international data/standards	Calculations of GDP indicators comply with international standards. The 2008 SNA prepared by the International Monetary Fund, the Organization for Economic Cooperation and Development, the Statistical Office of the European Communities, the United Nations and the World Bank was used as a methodological basis.			
8. References and documentation	-
