

1. Information about the indicator	
Goal	Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development
Task	Developed countries to implement fully their official development assistance commitments, including the commitment by many developed countries to achieve the target of 0.7 per cent of gross national income for official development assistance (ODA/GNI) to developing countries and 0.15 to 0.20 per cent of ODA/GNI to least developed countries; ODA providers are encouraged to consider setting a target to provide at least 0.20 per cent of ODA/GNI to least developed countries
The indicator	Net official development assistance, total and to least developed countries, as a proportion of the Organization for Economic Cooperation and Development (OECD) Development Assistance Committee donors' gross national income (GNI)
2. Information about the organization	
Organization	Ministry of Foreign Affairs of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The indicator "Net official development assistance (both total and allocated to least developed countries) as a percentage of the gross national income (GNI) of donors -members of the Development Assistance Committee of the Organization for Economic Cooperation and Development (OECD)" is defined as net ODA as a percentage of GNI.
Basic concepts:	ODA: The DAC (Development Assistance Committee) defines ODA as "flows to countries and territories from the list of recipients of DAC's ODA and to multilateral institutions that: 1) are provided by official institutions, including state and local authorities, or their executive bodies; and 2) each transaction is carried out with the aim of contributing to the economic development and well-being of developing countries as the main goal; is preferential in nature and includes a so-called subsidy element of at least 25 percent (calculated at a discount of 10 percent).
Justification and	The total volume of ODA flows to developing

interpretation	countries quantifies the public efforts that donors provide to developing countries.
4. Data sources and collection methods	
Data sources	The OECD/DAC has been collecting data on official and private resource flows since 1960 at the aggregated level and since 1973 at the activity level through a System of Reporting to Creditors (SOC data has been considered completed since 1995 for obligations at the activity level and since 2002 for payments).
Data collection methods	The data is provided by donors in accordance with the same OECD standards and methodologies. The statistical data provider is responsible for collecting DAC statistics in each supplier country/institution. The provider is usually located at a national aid agency, Ministry of Foreign Affairs or Finance, etc.
Unit of measurement	Percent
Periodicity	The data is provided on an annual basis each calendar year by statistical data providers in national administrations (aid agencies, ministries of foreign affairs or finance, etc.).
5. Calculation method and other methodological considerations	
Calculation method:	Net ODA as a percentage of gross national income
Comments and restrictions:	The data has been available since 1960
6. Data availability and disaggregation	
Data availability and gaps:	On a donor basis for all CEB member countries and many non-CEB suppliers (bilaterally and multilaterally) that report to CEB.
The level of disaggregation:	The level of disaggregation is not used for the indicator.
7. Comparability with international data/standards
