

1. Information about the indicator	
Goal	Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development
Task	Mobilize additional financial resources for developing countries from multiple sources
The indicator	Ratio of gross inflow of direct investments to Kazakhstan from foreign direct investors
2. Information about the organization	
Organization	National Bank of the Republic of Kazakhstan, Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The ratio of gross direct investment inflows to Kazakhstan from foreign direct investors as a percentage of GDP in annual terms.
Basic concepts:	Direct investment is a type of international investment made by a resident in one country (direct investor) in order to realize his long-term interest (ownership of at least 10% of voting shares or equivalent) in a recipient company of direct investment, which is a resident of a country other than the country of location of the direct investor (Source: The OECD Reference Definition for Foreign Direct Investment, 4th edition).
Justification and interpretation	This indicator is widely used in national and international practice to determine the degree of investment attractiveness of a country, including the liberality of legislation, ease of doing business, the availability of investment projects and the availability of information about them, to assess external financing in proportion to the volume of domestic output.
4. Data sources and collection methods	
Data sources	Forms of departmental statistical reporting on the balance of payments and administrative reporting in the framework of currency regulation (https://nationalbank.kz/ru/news/formy-statisticheskoy-i-administrativnoy-otchetnosti); information on GDP from the Internet resource of the Bureau of National Statistics of the Agency for Strategic Planning and Reforms.
Data collection methods	Departmental statistical observations and survey of residents on administrative reporting forms
Unit of measurement	as a percentage
Periodicity	annually
5. Calculation method and other methodological considerations	
Calculation method:	The indicator is calculated as the gross inflow of direct investment to Kazakhstan from foreign direct investors per year in US dollars divided by the gross domestic product in annual dollar terms

Comments and restrictions:	The gross inflow of direct investments to Kazakhstan from foreign direct investors includes: - increase in equity instruments: acquisition by non-residents of at least 10% of voting shares or stakes in Kazakhstani enterprises from residents, acquisition by non-residents of real estate in Kazakhstan from residents; - reinvested income: the share of foreign direct investors in the retained earnings (loss) of Kazakhstani enterprises; - increase in debt instruments: receipt of funds (both in cash and in other forms - in the form of goods, works, services, intangible assets, purchase of securities, etc.) from foreign direct investors, excluding repayment.
6. Data availability and disaggregation	
Data availability and gaps:	The data is available on the website of the National Bank of the Republic of Kazakhstan and the BNS ASPR.
The level of disaggregation:	The data should not be disaggregated by gender and age.
7. Comparability with international data/standards	The data is fully comparable and is generated in accordance with international standards (OECD Reference Definition for Foreign Direct Investment, 4th edition, Balance of Payments and International Investment Position Guide, 6th edition)
