

1. Information about the indicator	
Goal	Strengthening the means of implementation and intensifying work within the framework of the Global Partnership for Sustainable Development.
Task	To mobilize additional financial resources for developing countries from several sources.
The indicator	The share of remittances (in US dollars) as a percentage of GDP
2. Information about the organization	
Organization	National Bank of the Republic of Kazakhstan, Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	Personal remittances received as a share of GDP represent the inflow of personal remittances expressed as a percentage of gross domestic product (GDP).
Basic concepts:	Personal transfers include personal transfers and employee salaries. Personal transfers consist of ongoing transfers in cash or in kind made by resident households for the benefit of non-resident households or received by resident households from non-resident households. Thus, personal transfers include all current transfers between resident individuals and non-resident individuals. Employee salaries relate to the income of borderline, seasonal, and other short-term workers who are employed in an economy where they are non-residents. The data is the sum of two articles defined in the sixth edition of the IMF's Balance of Payments and International Investment Position (BPM6) Guidelines: personal transfers and employee compensation. The concepts used correspond to the sixth edition of the IMF's Balance of Payments and International Investment Position (BPM6) Guidelines.
Justification and interpretation	Personal transfers are household incomes that come from foreign countries and arise mainly in connection with temporary or permanent relocation to these countries. The indicator allows you to estimate the amount of informal financing to the country.
4. Data sources and collection methods	
Data sources	The amount of data on personal transfers is based on data from banking statistics on payments and money transfers and estimates by the National Bank of Wages of Kazakhstanis employed in non-resident companies. Information on GDP published on the Internet resource of the National Tax Service of the Republic of Kazakhstan.
Data collection	Banking statistics on gratuitous cross-border transfers of individuals and the assessment of the NBK.

methods	
Unit of measurement	percent
Periodicity	annually
5. Calculation method and other methodological considerations	
Calculation method:	Personal transfers are the sum of two articles defined in the sixth edition of the IMF Balance of Payments Manual: personal transfers and employee compensation. The indicator is calculated as the ratio of personal transfers in US dollars to gross domestic product.
Comments and restrictions:	
6. Data availability and disaggregation	
Data availability and gaps:	The data is available on the Internet resources of the NBRK and the BNS ASPR RK
The level of disaggregation:	Not provided for
7. Comparability with international data/standards	The data is generated in accordance with international standards (sixth edition of the IMF Balance of Payments and International Investment Position Manual - BPM6).
8. References and documentation	URL: www.worldbank.org Ссылки: The data is compiled in accordance with the sixth edition of the Balance of Payments and International Investment Position Manual (BPM6). The manual is available at:https://www.imf.org/external/pubs/ft/bop/2007/bopman6.htm The GDP data is compiled in accordance with the methodology of the 2008 SNA of National Systems (2008 SNA).
