

1. Information about the indicator	
Goal	Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development
Task	Assist developing countries in attaining long-term debt sustainability through coordinated policies aimed at fostering debt financing, debt relief and debt restructuring, as appropriate, and address the external debt of highly indebted poor countries to reduce debt distress
The indicator	Debt service as a proportion of exports of goods and services
2. Information about the organization	
Organization	National Bank of the Republic of Kazakhstan, Ministry of Finance of the Republic of Kazakhstan, Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The ratio of payments on the principal debt and remuneration on state and state-guaranteed external debt as a percentage of exports of goods and services in annual terms
Basic concepts:	The concepts of "government and government-guaranteed external debt" and "exports of goods and services" correspond to the Manual on External Debt Statistics (2014), the sixth edition of the Manual on Balance of Payments and International Investment Position (2009).
Justification and interpretation	The indicator allows you to determine the share of exports (receipts in foreign currency) that accounts for payments on the principal debt and remuneration for external obligations of the state and government-guaranteed loans (most often in foreign currency); it can serve as an indicator of the country's liquidity and solvency.
4. Data sources and collection methods	
Data sources	Information on state and state-guaranteed external debt generated by the Ministry of Finance of the Republic of Kazakhstan within the framework of budget legislation, data from the National Bank on exports of goods and services according to the balance of payments classification (trade data from authorized bodies of the BNS ASPRi CGD MF with the calculation of the National Bank of the Republic of Kazakhstan in accordance with the methodology of the balance of payments).
Data collection methods	Information from the Ministry of Finance of the Republic of Kazakhstan on repayment and servicing of government external debt, departmental statistical observations, trade data from the Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the State Revenue

	Committee of the Ministry of Finance of the Republic of Kazakhstan, estimates of the National Bank of the Republic of Kazakhstan.
Unit of measurement	percent
Periodicity	annually
5. Calculation method and other methodological considerations	
Calculation method:	The indicator is calculated as the volume of payments for repayment and servicing of government and government-guaranteed external debt for the year divided by exports of goods and services according to the balance of payments classification in annual terms.
Comments and restrictions:	
6. Data availability and disaggregation	
Data availability and gaps:	The data is available on the BNS ASPR website.
The level of disaggregation:	The data is not subject to gender and age disaggregation.
7. Comparability with international data/standards	The data is fully comparable and is generated in accordance with international standards (Balance of Payments and International Investment Position Manual, 6th edition; External Debt Statistics: a Guide for Compilers and Users, 2014).
8. References and documentation	References: The data are compiled in accordance with the sixth edition of the Balance of Payments and International Investment Position Manual (BPM6). The manual is available at: https://www.imf.org/external/pubs/ft/bop/2007/bopman6.htm Метаданные также доступны по адресу: https://stat.gov.kz/ru/sustainable-development-goals/goal/17/
