

1. Information about the indicator	
Goal	Ensuring the availability and rational use of water resources and sanitation for all
Task	To support and strengthen the participation of local communities in improving water management and sanitation
The indicator	The proportion of basin councils with rules and procedures for citizen participation in water resources management
2. Information about the organization	
Organization	Committee on Regulation, Protection and Use of Water Resources of the Ministry of Water Resources and Irrigation of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The indicator is calculated as the ratio of the total number of established Basin Councils multiplied by the number of basins by 100 percent.
Basic concepts:	1. The Basin Council is an advisory body established within the relevant basin. 2. The Basin Council, headed by the head of the relevant basin inspectorate, consists of the heads of local representative and executive bodies of the regions (cities of republican significance, the capital), heads of territorial bodies of state bodies and representatives of water users. The basin council may also include representatives of public associations and their associations. The basin Inspectorate is responsible for organizing the work of the Basin Council. 3. The Basin Council considers current issues in the field of use and protection of water resources, water supply and sanitation, makes suggestions and recommendations for the participants of the basin agreement.
Justification and interpretation	In accordance with the current water legislation of the Republic of Kazakhstan, water resources management is based on the basin principle, and not on the administrative principle. In accordance with subparagraph 2) According to paragraph 2 of Article 40 of the Water Code, basin inspections are charged with coordinating the activities of subjects of water relations in the use of water resources in order to achieve a positive economic effect, reasonable, equitable and environmentally sustainable water use. In order to implement this function, paragraph 1 of Article 42 of the Code establishes that basin inspections, local executive bodies of regions (cities of republican significance, the capital) and other entities located within the basin of a water body conclude Basin agreements on the restoration and protection of water bodies (hereinafter referred to as basin agreements) in order to combine and coordinate them activities, as well as the implementation of measures for the restoration and protection of water bodies. Also, in accordance with paragraph 1 of Article 43 of the Code, it is regulated that, within the framework of the basin agreement, a Basin Council is established, which is an advisory body. In accordance with paragraph 2 of this article, the organization of the work of the basin council is entrusted to the basin Inspectorate. To date, 8 Basin Councils have been established, and 13 Basin Council meetings have been held annually since 2015.
4. Data sources and collection methods	

Data sources	The source is the reporting data of the Basin Councils on the meeting
Data collection methods	-
Unit of measure ment	Percent
Periodicity	annually
5. Calculation method and other methodological considerations	
Calculation method:	The indicator is calculated as the ratio of the total number of Basin Councils created by the number of basins multiplied by 100%.
Comments and restrictions:	-
6. Data availability and disaggregation	
Data availability and gaps:	
The level of disaggregation:	Republic of Kazakhstan
7. Comparability with international data/standards	alternative indicator
8. References and documentation
