

1. Information about the indicator	
Goal	End poverty in all its forms everywhere
Task	By 2030, build the resilience of the poor and those in vulnerable situations and reduce their exposure and vulnerability to climate-related extreme events and other economic, social and environmental shocks and disasters
The indicator	Number of deaths, missing persons and directly affected persons attributed to disasters per 100,000 population
2. Information about the organization	
Organization	Ministry of Emergency Situations of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	Indicators are defined as the number of deaths and injuries as a result of natural emergencies divided by the total population per 100,000 people.
Basic concepts	The victim is an individual who has suffered harm (damage) as a result of a natural or man-made emergency (Source: The Law of the Republic of Kazakhstan "On Civil Protection"); The deceased is an individual who died as a result of a natural and man-made emergency.
Justification and interpretation	The authorized body in the field of civil protection provides leadership, intersectoral coordination, and implementation of state policy in the field of civil protection in terms of preventing and eliminating natural and man-made emergencies, providing emergency medical and psychological assistance to the population in the emergency zone, and taking measures aimed at reducing the risks of natural or man-made emergencies, minimizing material damage and human losses. According to the Law of the Republic of Kazakhstan "On Civil Protection", state accounting is conducted in the field of civil protection.
4. Data sources and collection methods	
Data sources Data	The source is operational information received by the duty services of the Ministry of Emergency Situations of the Republic of Kazakhstan.
collection methods	Registration of victims and those killed as a result of natural and man-made emergencies
Unit of measurement	per 100,000 people
Periodicity	annually
5. Calculation method and other methodological considerations	
Calculation method:	The figures are calculated as the number of deaths and injuries as a result of natural emergencies recorded in the current year divided by the total population in the same year, per 100,000 people.
Comments and restrictions:	There is no national database on victims/deaths of natural disasters that meets the UN recommendations. The Ministry of Emergency Situations of the Republic of Kazakhstan does not collect data on the "missing/presumed dead".
6. Data availability and disaggregation	
Data availability and gaps:	The data is available on the website of the Ministry of Emergency Situations of the Republic of Kazakhstan.
The level of	Data on the injured and dead are disaggregated by region.

disaggregation:	
7. Comparability with international data/standards	There is no International Classification of victims and deaths caused by natural disasters, which would allow comparing national and international data.
