

1. Information about the indicator	
Goal	End poverty in all its forms everywhere
Task	Create sound policy frameworks at the national, regional and international levels, based on pro-poor and gender-sensitive development strategies, to support accelerated investment in poverty eradication actions
The indicator	Proportion of government recurrent and capital spending to sectors that disproportionately benefit women, the poor and vulnerable groups
2. Information about the organization	
Organization	Ministry of Finance of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The share of government spending indicator determines the amount of spending from the total amount of a country's spending on poverty eradication, allocated by the state through direct distribution of funds among individuals or households belonging to the poor in monetary terms.
Basic concepts:	The state budget is a centralized monetary fund of the state that unites the republican and local budgets without taking into account the mutually redeemable transactions between them. The costs of social assistance and social security for low-income citizens include the costs of securing obligations for social payments, benefits, social services and assistance, employment, migration
Justification and interpretation	Social expenditures aimed at the poor are considered in comparison to the total proportion of the population living below the official poverty line. The amount of financial obligations of the state allocated for services and transfers to low-income groups of society ensures the eradication of poverty among the population. Expenditures are interpreted as aimed at eradicating poverty among the population while exceeding the share of expenditures for the benefit of the poor from the share of people living below the poverty line.
4. Data sources and collection methods	
Data sources Data	State Budget Execution Report
Collection Methods	IP "e-Ministry of Finance"
Unit of measurement	percentage
Periodicity	annually
5. Calculation method and other methodological considerations	
Calculation method:	The indicator is calculated as the ratio of the volume of expenditures on social assistance and social security to the total volume of expenditures of the state budget as a percentage
Comments and restrictions:	The indicator is calculated based on the reporting data on the execution of the state budget for the corresponding year.
6. Data availability and disaggregation	
Data availability and gaps:	Government expenditure data is available on the page of the Unified Portal of the Internet resources of government agencies. According to

	the classification of expenditures, the amount of expenditures directed in the interests of the poor is fixed in the 6th functional group of the expenditure "Social assistance and social security", the structure of which is determined in accordance with the Order of the Minister of Finance of the Republic of Kazakhstan dated September 18, 2014 No. 403 "Some issues of the Unified Budget Classification of the Republic of Kazakhstan"
The level of disaggregation:	The share of expenditures is disaggregated by type of budget - for the republican and local budgets. The republican budget determines the amount of expenditures allocated to the administrator of the republican budget programs - the central executive and other central government agencies. The local budget determines the amount of expenditures allocated to the administrator of local budget programs, determined based on the basic structure of local government, approved by the Government of the Republic of Kazakhstan, and the management scheme of the relevant administrative-territorial unit.
7. Comparability with international data/standards	It is an international indicator
